Summary

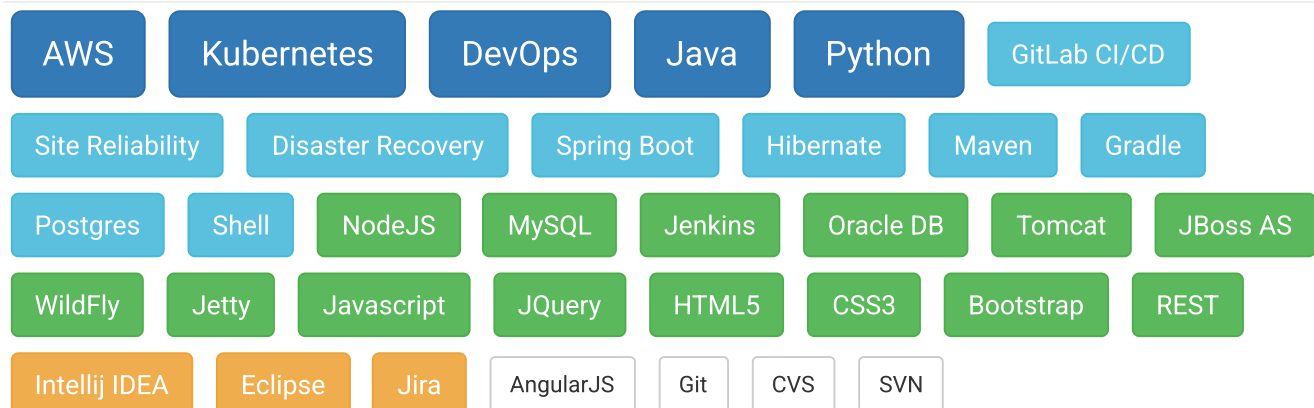

I'm a quick learner who thrives in the gray areas of problem-solving and embraces ambiguity head-on. I enjoy taking full ownership of projects, from conception to production, constantly seeking opportunities to automate, optimize, and improve existing solutions.

My work is customer-centered—I want users to love their experience with the products as much as I enjoy coding for them. With colleagues, I embrace differences and debates as opportunities to move forward and get ~~things~~ shit done.

From designing Cloud (AWS) and on-prem solutions to mentoring teams and streamlining legacy systems, I've built my career on being resourceful, resilient, and adaptable.

Passionate about infrastructure maintenance, automation, and site reliability, and experienced in Java, Python, AWS, Kubernetes, and CI/CD, I am seeking opportunities in a fast-paced environment with strong leadership that nurtures autonomy and trust, where I can make a meaningful impact.

Skills & Expertise

JUNE 2017 - PRESENT

PRINCIPAL ENGINEER

Company [Conservis](#)

In charge of

- Architectural long-term direction
- AWS/GCP infrastructure and Kubernetes cluster support
- Observability, Logging, Monitoring, Disaster Recovery, and Site Reliability
- CI/CD (GitLab/GitHub) implementation, guidelines and maintenance
- Refactoring and Integration
- QA Automation kick-off & oversight
- 3rd party dependencies upgrade
- Open source contribution

Platform - RowCrop & PermCrop

[Row Crop](#) is a Farm Management System to track various crops throughout different stages - Production, Planning, Harvest.

- Infrastructure-as-a-Code implementation
- 3rd party libraries/Java upgrade and refactoring
- DevOps & Reliability support
- Monolith decomposition
- QA Automation framework inception
- SSO/Identity implementation
- Service Discovery implementation

Environment

Tools GitLab, AWS, Kubernetes

Techs Spring Boot, ReactJS, Django

Open Source Contribution

- [keycloak](#)
- [oauth2-proxy](#)
- [cytopia/docker-bind](#)
- [Conservis kube-asg-node-drainer](#)
- [django-oidc-provider](#)
- [GitLab pipeline trigger](#)

JULY 2014 - JUNE 2017

APPLICATION ARCHITECT

Company [Coherent Solutions Inc.](#)

Responsibilities

- Performing all phases of software engineering including requirements analysis, application design, code development and testing
- Architectural assessment of legacy applications
- Providing technical support to Sales Team
- Implementing POC applications
- Expanding DevOps practices
- Responsible for Continuous Integration/Continuous Delivery
- Setting code quality standards
- Managing team, mitigating risks and issues
- Reviewing code and providing feedback relative to best practices

ServeMinnesota - RCDMS

[Reading Corps](#) is a breakthrough program that is changing academic outcomes for thousands of students. With more than 1,500 tutors serving in eight states and Washington D.C., Reading Corps is helping more than 36,000 children each year become successful readers.

- Designed the architecture
- Prepared project structure
- Set up Continuous Integration/Continuous Delivery

Environment

Tools GitHub, Amazon Web Services, Docker

Techs Spring Boot, JHipster, Spring Security, AngularJS, NodeJS, Hibernate, REST API

Element Consulting

Element Consulting together with [Twin Cities Orthopedics](#) are creating an application to leverage Bundle Payments for Care Improvement initiative.

- Designed the architecture
- Prepared project structure
- Set up Continuous Integration
- Executed code reviews

Environment

Tools BitBucket, Amazon Web Services, Docker

Techs Spring Boot, JHipster, Spring Security, AngularJS, NodeJS, Hibernate, LiquiBase, REST API

Graco/Matrix

[Graco](#) provides products for painting, anti-corrosion, fluid transfer, gluing and sanitary applications for markets like automotive, aeronautic, body refinishing, wood, build and construction, and marine. Distribution is done via a

global network of equipment dealers and retail stores.

Matrix Total Fluid Management System provides automated tracking and monitoring plus state-of-the-art dispensing for complete control of your fluid inventory. Save time, gain billable hours and maximize your fixed operation's profitability with Matrix. System components include management software, Transceiver, Matrix Meter, Pump Air Control (PAC) and Tank Level Monitor (TLM). Together, these components wirelessly talk to each other through an RF signal to collect data from fluid dispenses, levels in bulk oil and waste tanks.

- Refactored old code basis to adhere to modern know-hows and frameworks
- Was implementing and leading the effort from Swing to Web UI, Spring 2 to Spring Boot
- Set up Continuous Integration
- Executed code reviews

Environment

Tools MySQL, SVN, GitHub, Jetty, Maven, Ant, Bamboo, Jira

Techs Servlets, Spring Boot, Spring IOC, Spring security, Hibernate, AngularJS, NodeJS, Bootstrap

NMDP

[National Marrow Donor Program \(NMDP\)](#) also known as Be The Match® is a global leader in bone marrow transplantation. They conduct research to improve transplant outcomes provide support and resources for patients, and partner with a global network.

Evgeni was leading effort of providing architectural assessment of several projects implemented in-house. A detailed system review was conducted including static and manual code analysis, identifying possible refactoring/improvements areas, evaluating adherence of the code basis to best development practices.

Environment

Tools Maven, SonarQube, FindBugs, Check, PMD, Code Coverage

Techs J2EE/Servlets/JSP, Spring, Spring Security, Oracle

JUNE 2011 - JUNE 2014

TEAM LEAD

Company [Coherent Solutions Inc.](#)

Responsibilities

- Performing design, development, legacy maintenance and bug fixing;
- Managing team, tracking progress of task completion, milestones, action items, risks, issues, conducting update meetings
- Executing code review and staff mentoring

API Outsourcing

API Outsourcing is a Finance and Accounting Outsourcing (FAO) company which offers a wide breadth of services for accounts payable, document management and bill presentment needs. Their system product provides standardized workflow to manage documents, accounts payables / receivables.

- Developed Web Form feature (flexible configurable screen configuration to create/update new POJO entities added on the fly)
- Implemented HTML5 responsive design (one application aimed on multiple (desktop and mobile) platforms)
- Implemented UI cached navigation for tables to gain performance
- Enhanced screen form configuration with inheritance
- Forked 3rd party open-source library Hibernate Audit with custom features and fixes

⚙ Environment

Tools MySQL 5.6, CVS, Jboss AS 7, Maven 3, Ant 1.9

Techs J2EE 6/Servlets/JSP, Spring 4, Spring Security, Apache Tiles 3, Hibernate 4, JavaScript / JQuery 1.10

InterCap

InterCap owns and deploys a U.S. Patented, state-of-the-art, artificial intelligence-based energy monitoring, reporting and management system called “The Intelligent Use of Energy” or IUE™. During this project my team added small features to the existing framework, fixed existing bugs, provided project enhancement ideas.

⚙ Environment

Tools MS SQL, Postgres, SVN, Tomcat 7, Maven, Ant

Techs J2EE/Servlets/JSP, Spring, Spring Security, Ibatis

Datalogics/ECCS Account Management Tool

Datalogics is the premiere Adobe partner for licensing PDF Toolkits to software developers and provides end-to-end tools to publishers and developers to support Adobe's rich eBook ecosystem.

⚙ Environment

Tools HSQLDB 2.2.9, Github, Tomcat 7, Maven 3, Ant 1.9

Techs J2EE/Servlets/JSP, Spring, Spring Security, Hibernate, JQuery, JQuery Datagrid

PeopleNet

The system works with on-board computers on vehicles, collects information about cars and drivers, analyzes the information and put the results to database. Also, the system has GUI (web interface) which provides capability to control car paths and analysis of trading logic, and displays the result in an easy-to-use form in browser.

⚙ Environment

Tools Liferay, Karaf, MSSQL 2008, Maven, Ant

Techs J2EE/Servlets/JSP, Javascript, GWT, Hibernate, Spring

AUGUST 2010 - MAY 2011

SENIOR JAVA DEVELOPER

Responsibilities

- Performing design, development, legacy maintenance and bug fixing
- Executing code review and staff mentoring

Standard Bank

The Standard Bank of South Africa Limited is one of South Africa's largest financial services groups. It operates in 32 countries around the world, including 19 in Africa. Our team developed CRM Web Application for bank agents.

- Performing UI development utilizing GWT
- Managing team (up to 3 persons) – plan tracking, task estimation, mentoring

⚙ Environment

Tools Maven 2/3, Jira, Eclipse, SVN

Techs Java, Javascript, GWT

JAN 2008 - JULY 2010

JAVA DEVELOPER

Company [Navagate Inc.](#)

Responsibilities

- Performing design, development, legacy maintenance and bug fixing;
- Executing code review and staff mentoring

Agility™ 3.1 - 4.0

CRM Server Application for Insurance business.

- Implemented JDBC-to-Hibernate and FormDesc-to-JSF transition
- Fulfilled JSF prototyping & Integration
- Executed customization and integration
- Micromanagement of Team (up to 3 persons) – plan tracking, task estimation, mentoring

⚙ Environment

Tools Maven 2, Jira, FishEye, Crucible, Servers: WebSphere, Apache Tomcat, Oracle 10g, MS SQL 2005

Techs Java 1.6, JSP, Servlets, Spring, Spring Webflow, JSF, RichFaces, Hibernate; AJAX, DHTML, JavaScript, CSS; SQL, PL/SQL

JUNE 2007 - DEC 2007

QA ENGINEER

Responsibilities

- Performing Smoke, Functional and Regression Testing
- Fulfilling Test Case Design and Update

NY Life Party, NY Life Investments

Customization of Agility™ - CRM Server Application for Insurance business.

 Environment

Tools Lotus Notes

★ Honors & Awards

APR. 2017

AWS CERTIFIED SYSOPS ADMINISTRATOR – ASSOCIATE

Issuer Amazon Web Services

MAR. 2017

AWS CERTIFIED DEVELOPER – ASSOCIATE

Issuer Amazon Web Services

OCT. 2016

AWS CERTIFIED SOLUTIONS ARCHITECT - ASSOCIATE

Issuer Amazon Web Services

APR. 2011

ORACLE CERTIFIED PROFESSIONAL, JAVA EE 5 WEB COMPONENT DEVELOPER
